-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This is the First Office Action on the Merits from the examiner in charge of this application.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 3,178,246 to Riles.

Riles discloses a metal cabinet comprising all the elements recited in the above listed claims including, such as shown in Fig 1, rectangular front and rear frames 1, a pair of top struts 7 fastened between the front and rear frames at the top, rectangular side panels 15, a top cover, a rear cover, wherein the side panels 15 are flush with the edges of the front and rear frames, such as shown in Figs 2 & 5, whereby the width of each side panel is less than the overall back-to-front depth of the cabinet, the top struts and the base panel are fastened between the front and rear frames by means of screws 16, the side panels, top cover and rear cover are fastened by means of screws 16.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Riles.

Riles discloses metal cabinet comprising all the elements as discussed above except for the method steps of constructing the cabinet as recited in claim 5. However, since Riles discloses all the structural elements recited in method claim 5, it would have been obvious and well within the level of one skill in the art to perform the method steps recited in claim 5.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cote et al, Adams et al, Herbeck et al, Wright, Wei, Anderson et al, Marzec et al, Schmalzl et al, and Schafer all show structures similar to various elements of applicant's disclosure.
